

HARI PRAKASH S

FRESHER

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience in building scalable ERP and web applications using ReactJS, Angular, .NET Web API, PostgreSQL, and Node.js. Skilled in REST API development, frontend-backend integration, database optimization, Retrieval-Augmented Generation (RAG), MCP-based AI integrations, and AI-assisted development tools including ChatGPT, Claude AI, and GitHub Copilot. Developed enterprise modules for Sales, Inventory, and Purchase Management during internships. Passionate about scalable software engineering, cloud technologies, and modern web development.

EDUCATION

MCA - Mepco Schelenk Eng College 2024- 2026
Anna University - CGPA : 8.1/10

BCA - VHNSN College 2021- 2024
76/100

TECHNICAL SKILLS

- Languages: Java, Python, JavaScript, SQL, TypeScript
- Frontend: ReactJS, Angular, HTML5, CSS3, Bootstrap
- Backend: .NET Web API, Node.js, Express.js, Django, REST APIs
- Databases: PostgreSQL, MySQL, MongoDB
- Tools: Git, GitHub, Postman, VS Code
- Cloud & Deployment: AWS, Netlify, Vercel
- AI Technologies: RAG, LangChain, LangGraph, MCP, FAISS, ChromaDB, Prompt Engineering
- Concepts: OOP, CRUD, API Integration, Authentication, Responsive Design, Agile

CERTIFICATIONS

- NPTEL – Programming in Java, Cloud Computing, DBMS
- AWS – Introduction to Generative AI
- HackerRank – Java, Python, SQL
- Great Learning – ReactJS

SKILLS

- Communication skills
- Problem solving
- Time management
- Teamwork
- Adaptability

LANGUAGES

- Tamil
- English
- Telugu

PROFESSIONAL EXPERIENCE

Kalanjiyam Technical Solutions - Dec 2025 – May 2026

Full Stack Developer Intern - On-site

- Developed scalable ERP modules using ReactJS, .NET Web API, and PostgreSQL for business workflow automation.
- Designed and integrated RESTful APIs for Sales, Purchase, and Inventory Management systems.
- Improved backend query performance by 20% through PostgreSQL query optimization.
- Built responsive frontend interfaces in ReactJS, enhancing user experience and reducing manual operations.
- Collaborated in Agile development teams using Git and GitHub for version control and sprint workflows.
- Utilized AI tools such as ChatGPT and GitHub Copilot to accelerate development and debugging.

Zidio Development Company - Aug 2025 – Oct 2025

Full Stack Developer Intern - Remote

- Developed responsive frontend components and backend functionalities for web applications.
- Integrated REST APIs and implemented dynamic data handling using modern JavaScript technologies.
- Participated in debugging, testing, and deployment processes to improve application stability.
- Collaborated with development teams using Git and Agile methodologies.

PROJECTS

AWS Prime Analytics — Power BI

- Built interactive analytics dashboards for cloud-based business reporting.
- Analyzed large datasets to generate actionable insights and improve reporting efficiency.

AI Query Generator — ReactJS, SQL, REST API

- Developed an AI-assisted SQL query generation platform using ReactJS.
- Improved query generation efficiency and user interaction experience.
- Integrated responsive frontend design with dynamic API-based functionalities.

Job Portal — ReactJS, Node.js, Express.js, MongoDB, JWT

- Developed a full-stack job portal enabling job seekers to apply for jobs and recruiters to manage job postings.
- Implemented secure JWT-based authentication and role-based authorization for recruiters and applicants.
- Built RESTful APIs using Express.js and integrated MongoDB for user, job, and application management.

College ERP System — ReactJS, Node.js, Express.js, MongoDB, JWT

- Built a full-stack ERP platform for academic administration, covering student records, attendance, and course management.
- Designed role-based dashboards for admin, faculty, and students with secure JWT authentication and authorization.
- Developed RESTful APIs using Express.js and modeled relational student-course-faculty data in MongoDB.

Car Rental System — ReactJS, Node.js, Express.js, MongoDB, JWT

- Built a full-stack car rental platform with vehicle listing, date-range booking, and an admin approval workflow.
- Implemented booking-overlap detection to prevent double-booking and a live availability calendar per vehicle.
- Automated invoice generation on booking approval, with downloadable PDF invoices via PDFKit.
- Designed an admin panel with booking/vehicle/user management and analytics dashboards using Recharts.

AI-Powered Legal Research and Contract Analysis Platform

ReactJS, FastAPI, LangChain, LangGraph, ChromaDB, RAG, MCP, Groq LLM

- Developed an AI-powered legal research platform using ReactJS, FastAPI, LangChain, ChromaDB, and RAG.
- Built a document processing pipeline with PDF ingestion, embeddings, semantic search, and vector database integration.
- Designed multi-agent workflows using LangGraph and MCP for legal research, contract analysis, and automated report generation.
- Created an interactive dashboard featuring legal chat, document management, and contract comparison.
